

OMAR A. ALZUBI

FULL-STACK SOFTWARE ENGINEER • REACT • NODE.JS • POSTGRESQL

Orlando, FL (EST) • 419-685-2322 • omaralzubi.dev@gmail.com • [linkedin.com/in/omaralzubi-0070a](https://www.linkedin.com/in/omaralzubi-0070a) • github.com/Alzubi-Omar

PROFESSIONAL SUMMARY

Full-stack software engineer with production experience across React, Node.js, Express, and PostgreSQL, complemented by a decade of project and operations management experience. Comfortable owning delivery end-to-end — from database design and API architecture through interface implementation — with a strong focus on security, code quality, and maintainability. Experienced building and shipping production-grade applications with real-world API integration, authentication, and security hardening.

TECHNICAL SKILLS

Frontend: React 18, JavaScript (ES6+), TypeScript, HTML5, CSS3 (BEM), React Router v6, Vite, Tailwind CSS

Backend & Data: Node.js, Express.js, PostgreSQL, MongoDB, Mongoose, REST APIs, EJS

Tools & Quality: Git, GitHub, npm, VS Code, Helmet.js, Jest (foundational), React Testing Library (foundational)

Additional: Sass/SCSS, Webpack (foundational), GraphQL (concepts), Next.js (concepts), Jenkins CI/CD (concepts)

Fundamentals: C++, Java, C#, OOP, Data Structures & Algorithms (B.Sc. & M.Sc. coursework)

Workflow: Agile/Scrum, Jira, Backlog Management, Cross-Functional Collaboration

PORTFOLIO & DEPLOYED PROJECTS

Personal Finance Dashboard • In Progress · github.com/Alzubi-Omar/finance-dashboard

- React 18 + TypeScript + Vite — strict type safety across components, hooks, and API contracts
- TanStack Query for async state management with caching, refetching, and loading/error boundaries
- Recharts data visualizations and Tailwind CSS utility-first responsive layout
- Modular architecture with custom hooks, service layers, and reusable UI primitives

React Architecture Portfolio · omar-alzubi-portfolio.netlify.app

- Built with React 18, Vite, and React Router v6 — lazy loading, Suspense, and cross-page hash navigation
- Accessible component architecture with BEM CSS, ARIA attributes, focus management, and responsive design
- Web3Forms contact integration with loading, success, and error states — environment variables for key management

Daily Journal — Full-Stack Blog Platform · daily-journal-fuvd.onrender.com

- Express.js and PostgreSQL — full CRUD with bcrypt password hashing and security-first refactor
- Helmet.js HTTP headers, centralized exception handling, rate limiting, and strict session store configuration
- PostgreSQL atomic transactions for data integrity across all write operations

Puff of Air — Secure Weather Application · puff-of-air.onrender.com

- Node.js/Express with clean separation of concerns — config, middleware, services, and routes in separate layers
- OpenWeatherMap Geocoding API, Helmet.js CSP, rate limiting, and server-side request logging
- JSDoc documentation for architecture boundaries to streamline code review and maintainability

ToDoList — Task Manager · to-do-list-appm7vn.onrender.com

- Utilized Node.js, MongoDB, and Mongoose to implement custom lists, item editing, and persistent data storage
- Engineered dynamic routing to support flexible runtime list creation and asynchronous state synchronization

PROFESSIONAL EXPERIENCE

Independent PM & Operations Manager — Real Estate Development

Jan 2023 – Jun 2026

Amman, Jordan

- Managed logistics, documentation, and milestone tracking across complex, high-value asset transactions through project completion
- Coordinated vendor evaluation, procurement, and stakeholder communication across concurrent projects

Project & Operations Manager

May 2018 – Dec 2022

Delphos Wireless — Ohio, USA

- Owned end-to-end delivery of operational initiatives — backlog prioritization, stakeholder alignment, and release execution
- Translated business requirements into delivery roadmaps using Jira and MS Project
- Drove resolution of customer-impacting issues by defining root-cause requirements and coordinating cross-team solutions

Customer Service Representative & PM Support

Oct 2017 – May 2018

StarTek — Ohio, USA

- Supported cross-functional project coordination alongside PM team — requirements gathering, timelines, and stakeholder communication
- Contributed to backlog documentation and progress tracking in a fast-paced Agile environment
- Provided customer-facing support while actively developing project management skills

Facility & Operations Manager

Aug 2015 – Oct 2017

Ashland University — Ohio, USA

- Progressed from Equipment Checkout and Customer Service to Facility Manager through two internal promotions
- Managed staff, risk assessment, policy compliance, and weekly reporting to university leadership

Software Engineer

Jun 2011 – Apr 2013

ITAC — Amman, Jordan

- Refactored legacy C# enterprise data synchronization modules, utilizing strict OOP principles to split monolithic functions into modular, reusable components
- Optimized server memory management by implementing batch data processing for massive daily B2B transaction logs, completely eliminating peak-hour server timeouts and crashes
- Enforced deep type safety and robust validation layers to intercept and filter corrupted client data streams before database ingestion, ensuring data integrity across the system
- Reduced data processing latency by 40% and delivered a clean, documented architecture that streamlined code reviews and accelerated future feature deployment for the engineering team

EDUCATION

M.Sc. — Software Engineering · De Montfort University, United Kingdom

MBA — Project Management & Management Information Systems · Ashland University, Ohio

B.Sc. — Software Engineering · Philadelphia University, Jordan

Post-Graduate Coursework: Algorithms, Data Structures (C++), Operating Systems · Kent State University, Ohio

TECHNICAL CERTIFICATIONS

The Complete JavaScript Course — Jonas Schmedtmann · Credential: UC-0949ae5f

The Complete Full Stack Web Development Bootcamp — Dr. Angela Yu · Credential: UC-aec72398
